The i-Society 2006 online submission system is available online at <http://i-society.org/Papers/>.

Sponsored by:

In cooperation with:

Technical In-cooperation pending with

CS and TCEC

## Theme

The International Conference on Information Society (i-Society 2006) is a global knowledge-enriched collaborative effort that has its roots from both academia and industry. The conference covers a wide spectrum of topics that relate to information society, which includes technical and non-technical research areas.

The mission of i-Society 2006 conference is to provide opportunities for collaboration of professionals and researchers to share existing and generate new knowledge in the field of information society.

The conference encapsulates the concept of interdisciplinary science that studies the societal and technological dimensions of knowledge evolution in digital society. The i-Society bridges the gap between academia and industry with regards to research collaboration and awareness of current development in secure information management in the digital society.

## Keynote speakers

Wolfgang Gentsch, managing director at MCNC Grid Computing & Networking Services; adjunct professor at Duke University and University of North Carolina at Charlotte, USA

Luminita Vasiliu, chair of Software Engineering department and Wireless Information Technology Research Centre (WITRC), University of Westminster; chair of the BCS Wireless Specialist Group, UK
